IMAX[®]

Powerful Images. Powerful Insight.™

PHOTO: EMORY KRISTOF

TITANICA Director Stephen Low and members of the production team shoot footage of the Russian *MIR* submersibles as they are prepped for launch. The two submersibles, *MIR 1* and *MIR 11* carried the IMAX cameras on 17 dives to the *Titanic's* deep ocean grave 12,500 feet below the surface of the Atlantic and brought back some of the most spectacular footage the world has ever seen.

TRAINING AND SUPPORT PROGRAM

IMAX's camera rental and film production teams support filmmakers from initial concept to final product with operator training at our technology center near Toronto, a filmmakers' manual, the development of special camera accessories, a 24/7 emergency hotline and available field support.

IW5A CAMERA LENSES and ACCESSORIES
